

Lumenore

BRAND GUIDELINES

BRAND FOUNDATION

Who We Are

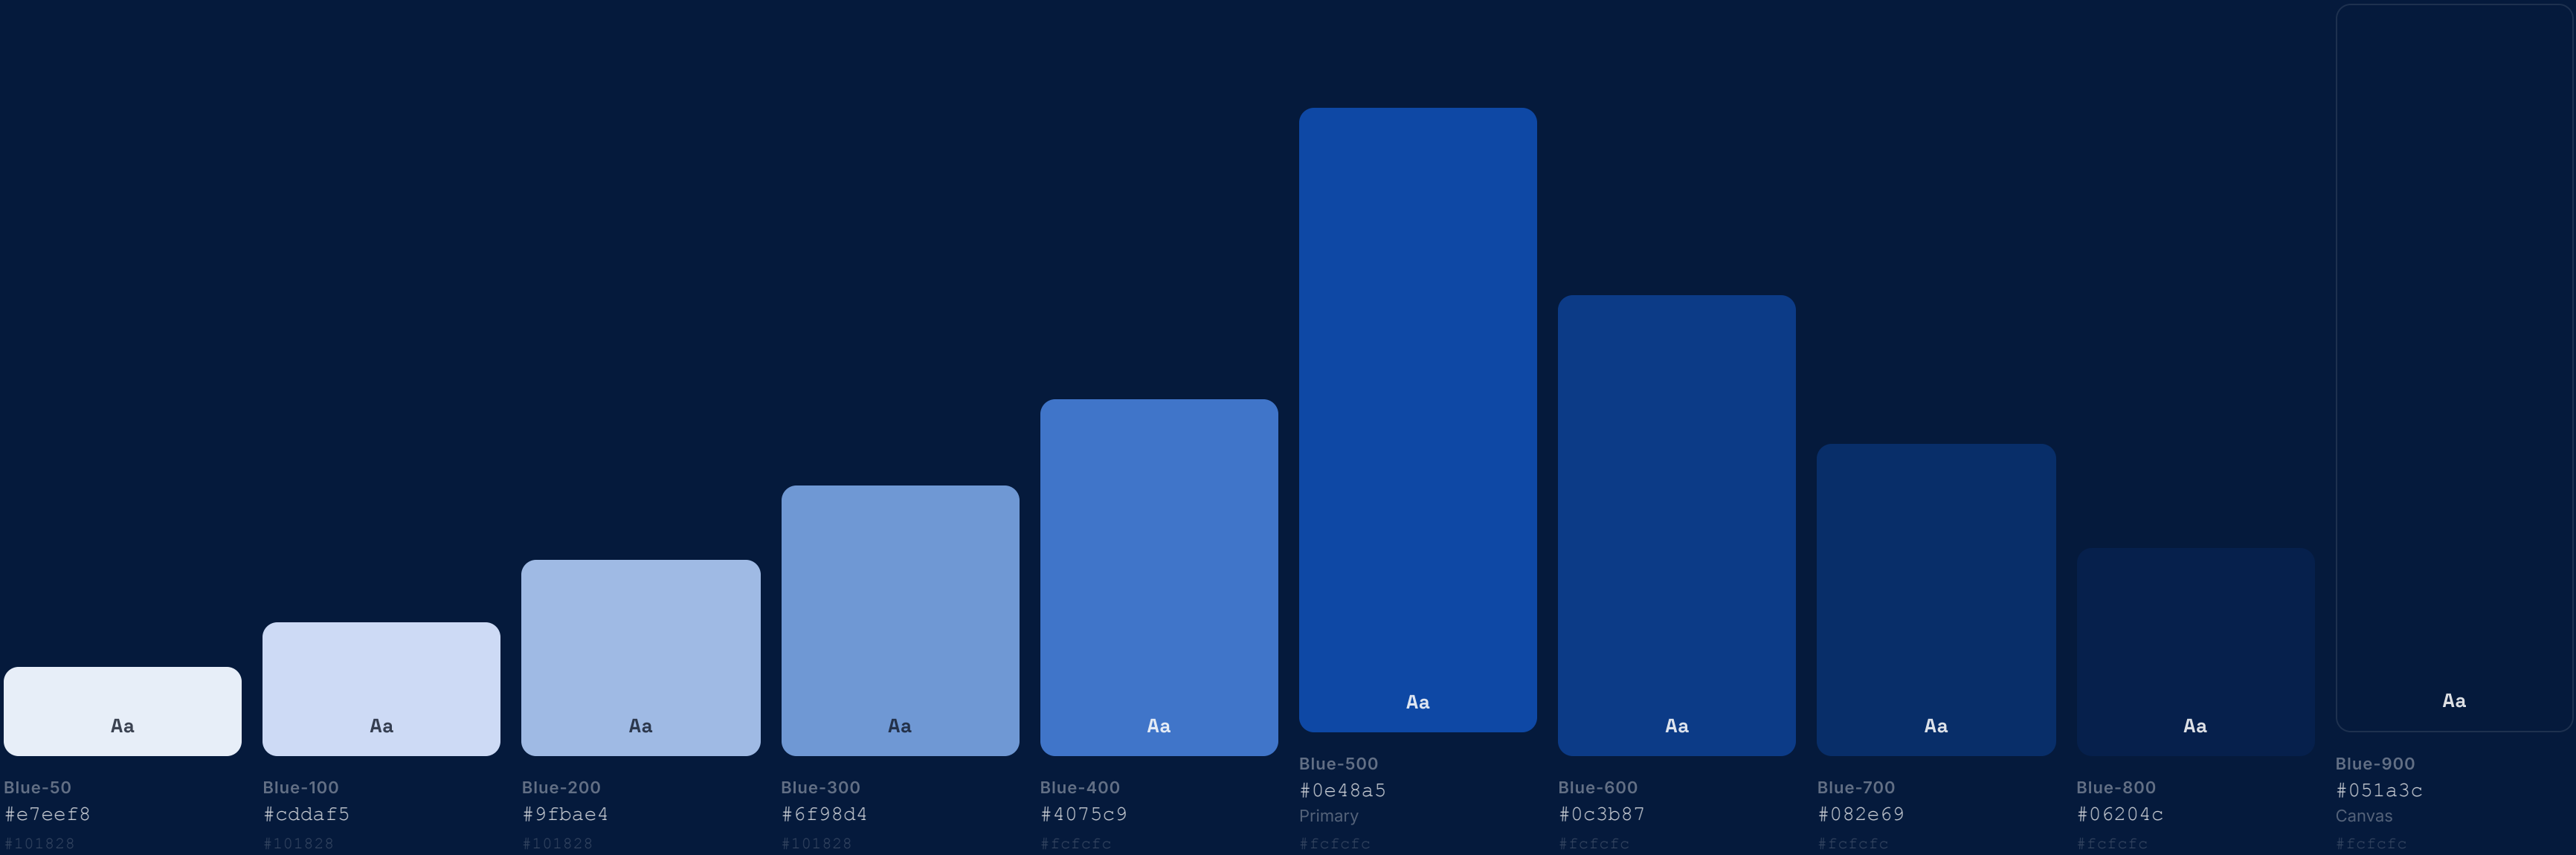

Lumenore is an agentic analytics platform for the enterprise — built for teams that need to move from question to decision without engineering overhead. Our design reflects that promise: intelligent, calm, and precise.

BRAND PERSONALITY

Intelligent.
Trustworthy.
Precise.
Calm.
Enterprise-ready.

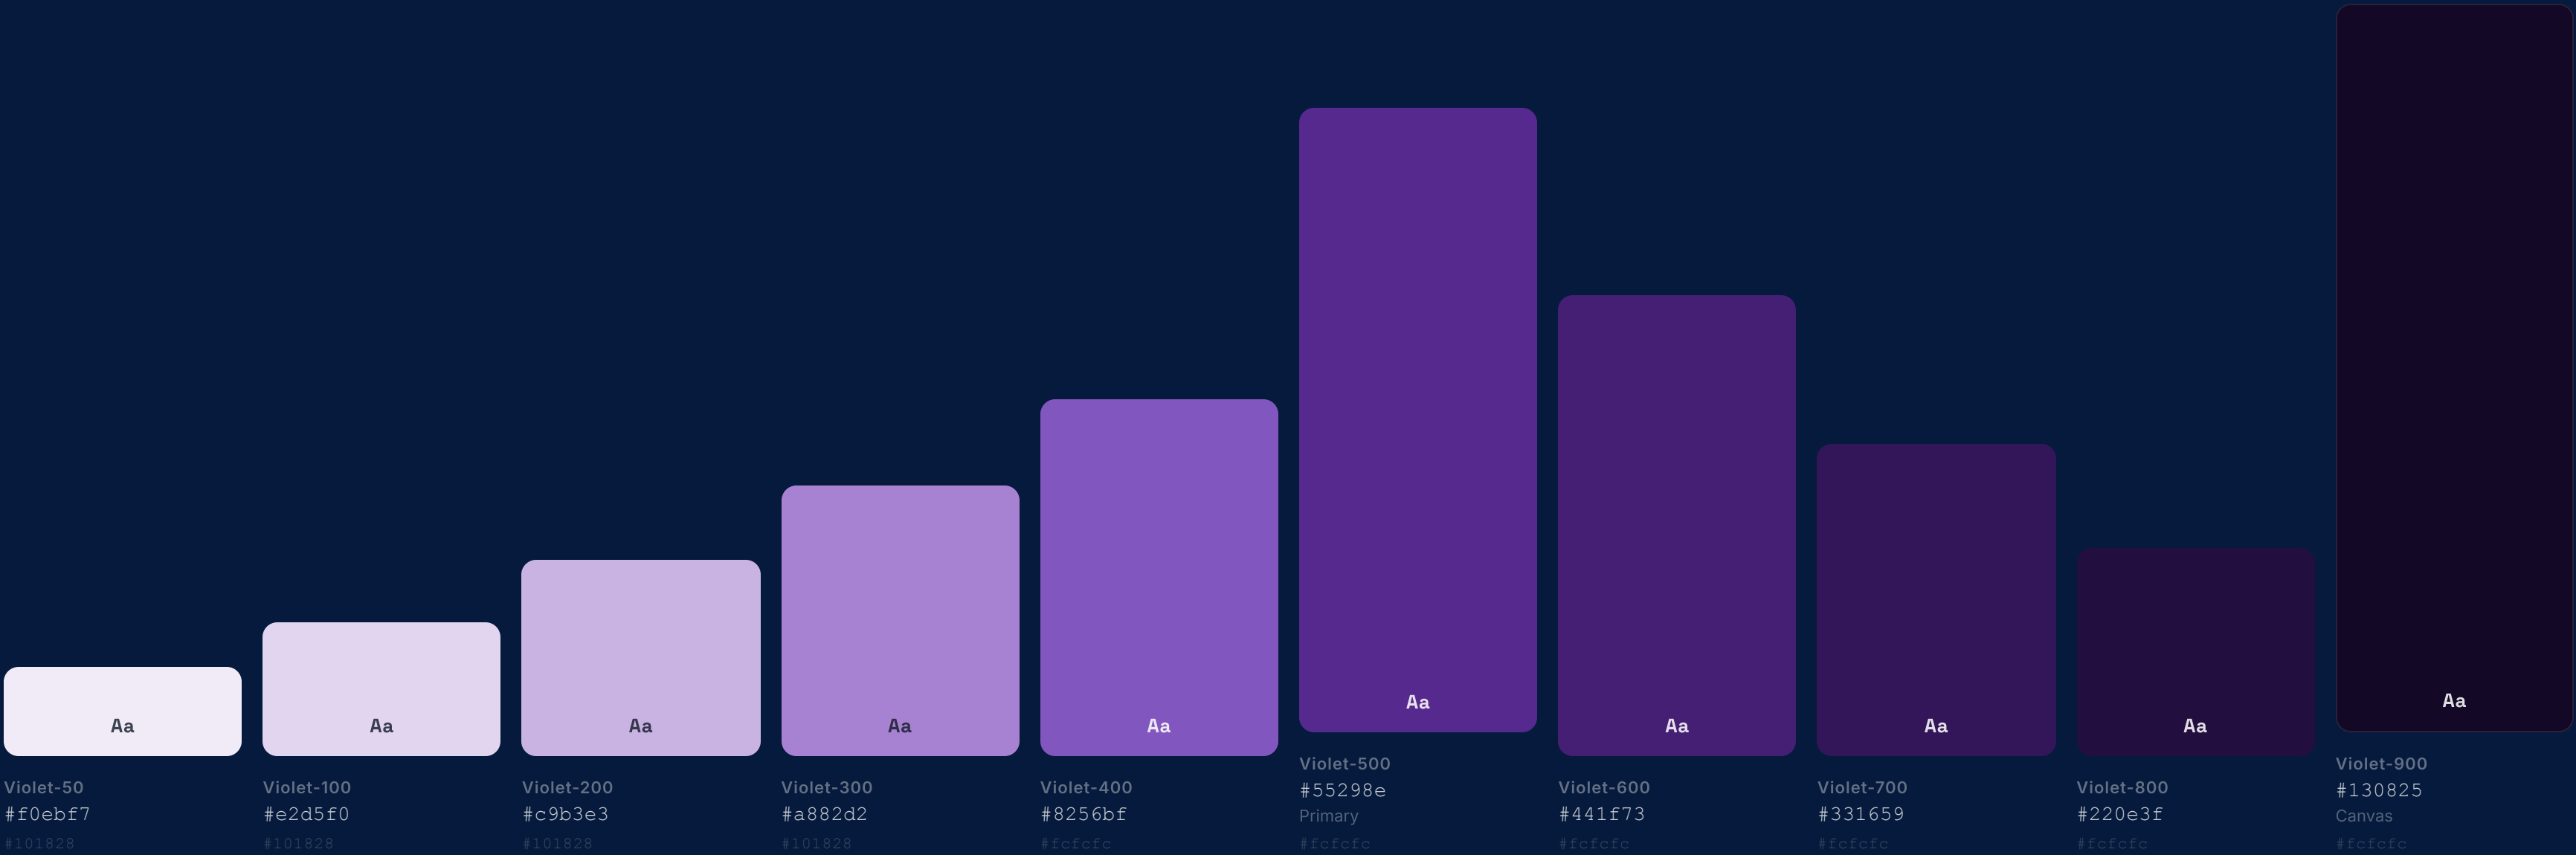

Royal Blue — Primary Palette

The full 50–900 ramp. From surface tints to interactive accents to the deep canvas.

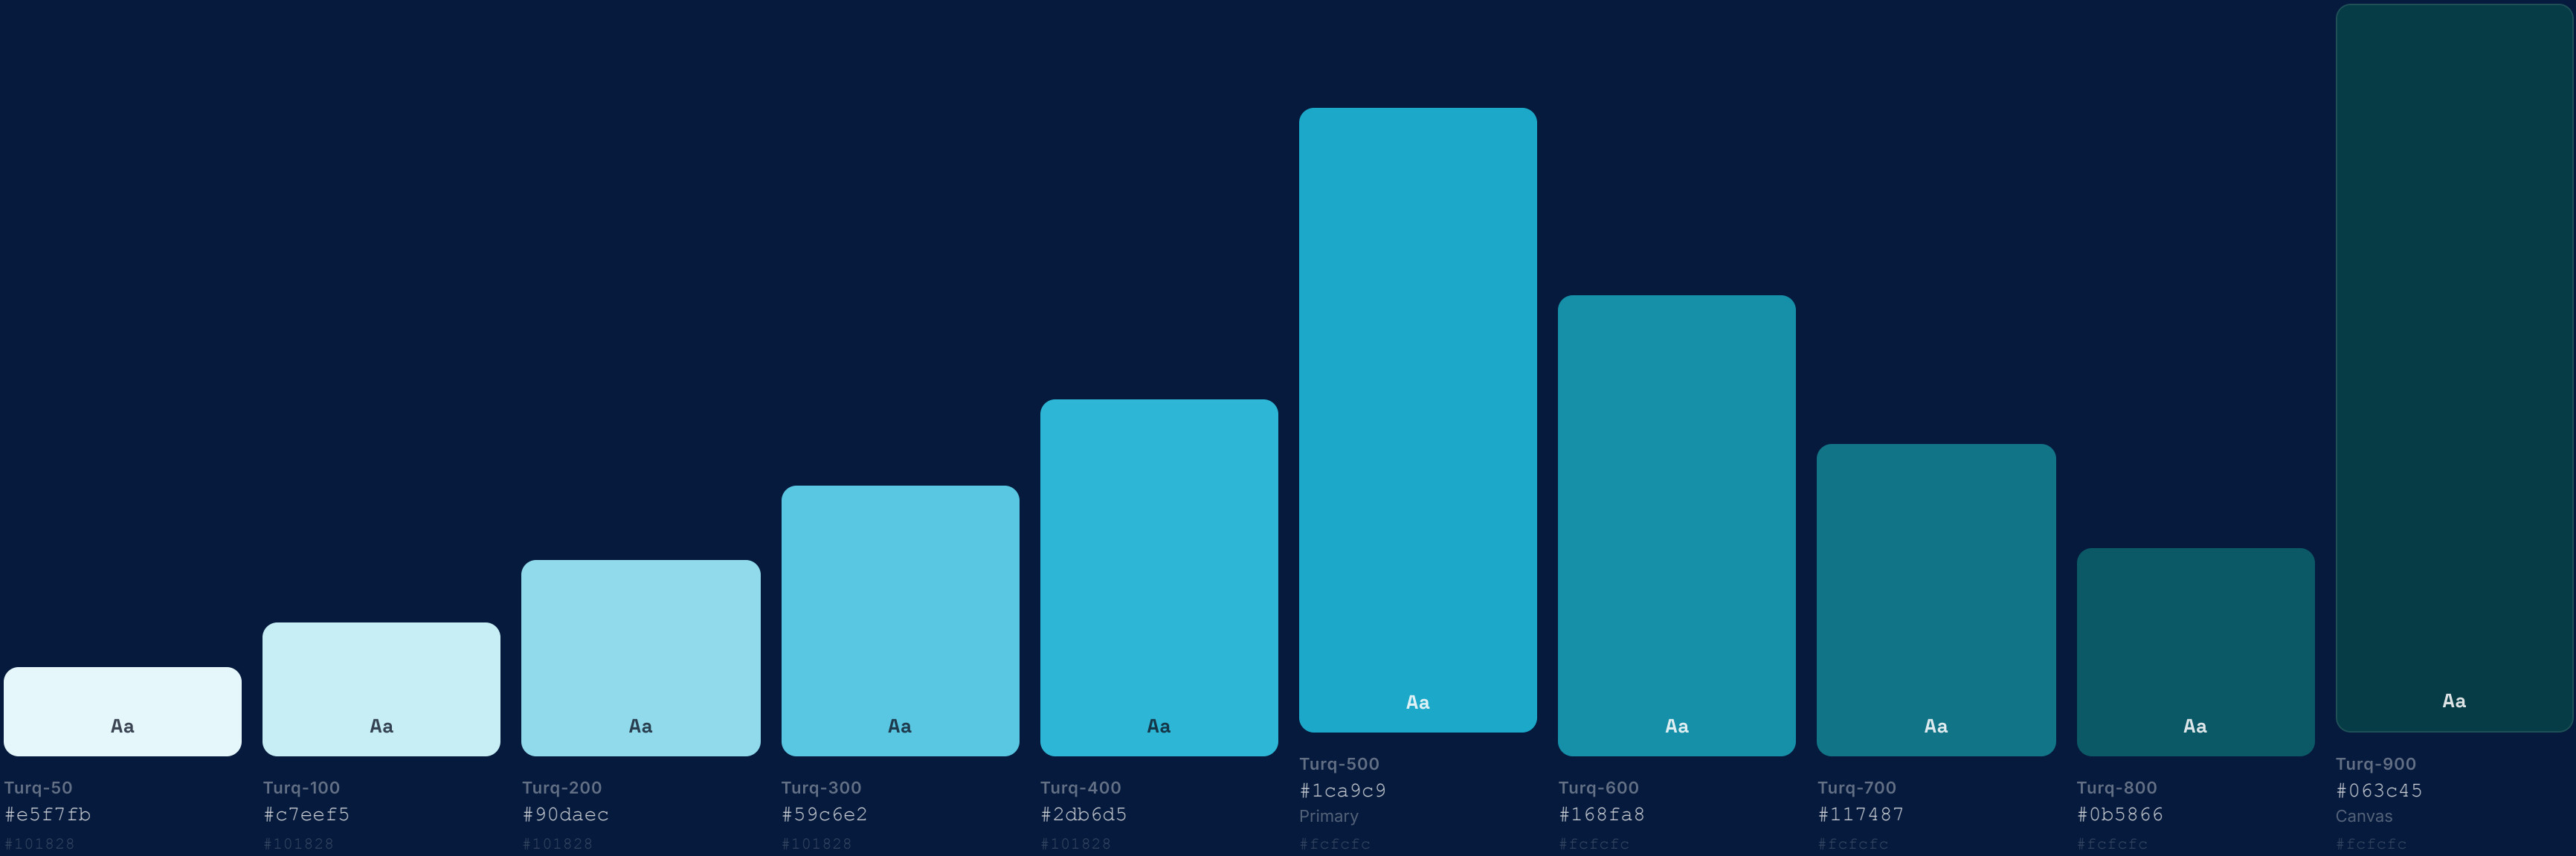

Violet — Secondary Palette

The full 50–900 ramp. From light tints to the Ask Me accent to the deep finale canvas.

Turquoise — Tertiary Palette

The full 50–900 ramp. Used for Data Magnet accents, hover highlights, and gradient endpoints.

Font Color — When to Use Dark or Light Text

DARK TEXT

Aa

#101828

Use on 50–300 tints across all brand color families, and as the default body copy color on all white and light-grey surfaces.

Blue 50–300

Violet 50–300

Turq 50–400

LIGHT TEXT

Aa

#fcfcfc

Use on 400–900 shades across Blue and Violet, on 500–900 in Turquoise, and on all dark canvas and overlay surfaces.

Blue 400–900

Violet 400–900

Turq 500–900

Royal Blue	50	100	200	300	400	500	600	700	800	900
Violet	50	100	200	300	400	500	600	700	800	900
Turquoise	50	100	200	300	400	500	600	700	800	900

Gradients

--Explore-Button

All primary CTA buttons. Never redeclare inline — always reference this token.

```
linear-gradient(  
  270deg,  
  #7747b6 0%,  
  #4075c9 50.7%,  
  #1ca9c9 100%  
)
```

--AI-Agents-Text

Hero H1 gradient span on "Agentic Analytics". Text use only — background-clip: text.

```
linear-gradient(  
  83.02deg,  
  #4AE7FF 51.42%,  
  #4075C9 63.25%,  
  #E879F9 76.03%  
)
```

--Search-Glow

Ambient glow behind hero search bar. Decorative only — not for UI elements.

```
linear-gradient(  
  86.83deg,  
  #22d3ee 0.77%,  
  #3b82f6 50%,  
  #e879f9 99.23%  
)
```

SPACE GROTESK

Aa

The enterprise deserves better than dashboards.
Agentic Analytics for teams that decide without waiting.

ROLE

All headings H1–H4 · Editorial display · Taglines
Weight: 300 Light only · Variation: 'SOFT' 0, 'WONK' 1

INTER

Aa

Designed for screens at every size. Precise spacing,
variable weight, exceptional legibility from caption to display.

ROLE

Body text · Navigation · Buttons · Labels · Legal copy
Weights used: 300, 400, 500, 600, 700

TYPOGRAPHY

Type Scale

A deliberate size ladder. Every step has a single semantic role — no two sizes serve the same function.

64 / 74px
Space Grotesk 300

H1 — Hero

44 / 54px
Space Grotesk 300

H2 — Section Heading

32 / 44px
Space Grotesk 500

H3 — Sub-heading

22 / 30px
Space Grotesk 500

H4 — Card & Pane Title

15 / 26px
Inter 400

Body — paragraph and feature copy. On dark: rgba(252,252,252, 0.72). On white: #4a5568.

11 / 16px
Inter 500–600

EYEBROW LABEL — SECTION IDENTIFIER

Spacing & Layout

8px base unit. Section padding is fixed — no exceptions permitted.

CONTAINER

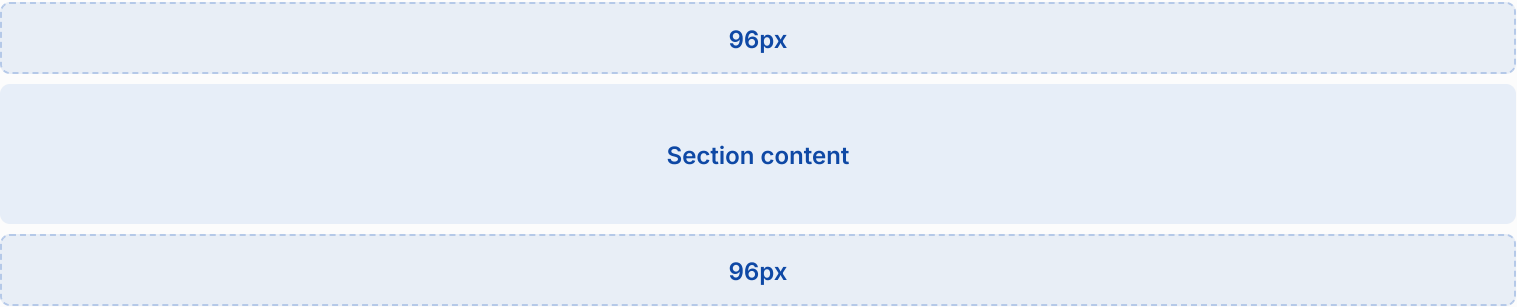

1320px max-width

All page sections use 1320px. The hero Lottie visual uses `margin-right: -80px` to bleed right — an intentional design exception.

SECTION PADDING

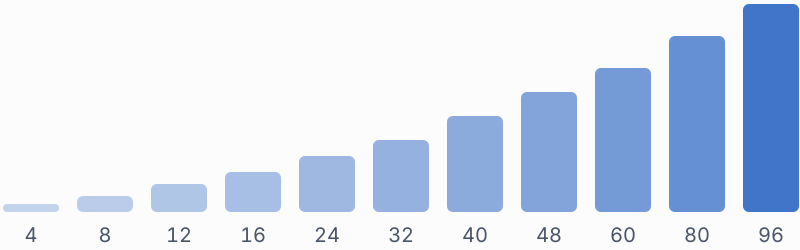

96px top & bottom

Intro block → content gap is always **60px** (margin-bottom on `.cm-intro`, `.personas-intro`, `.pricing-intro`, etc.)

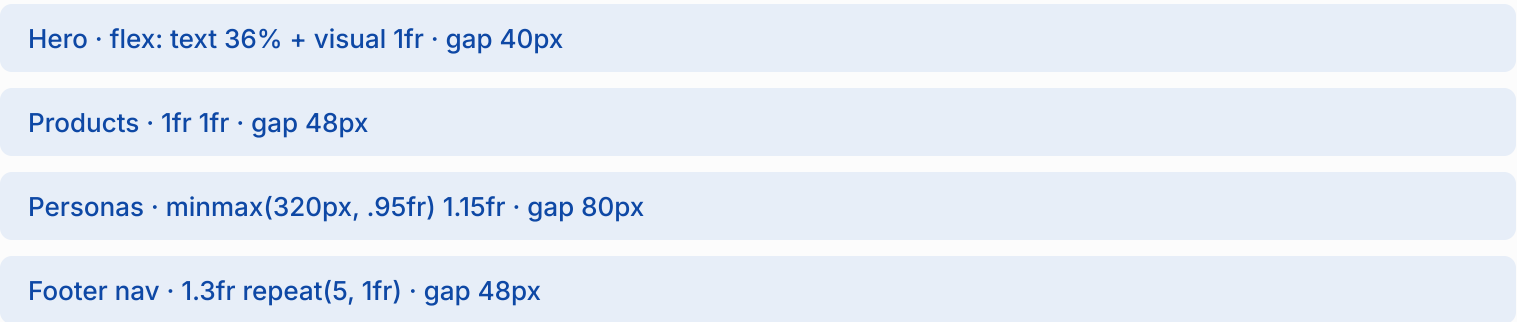

SPACING SCALE

8px base unit

GRID PATTERNS

Common layouts

Buttons, Radius & Chips

Every interactive element follows a strict radius discipline and uses token-defined gradients.

CHIPS & PILLS — ALWAYS 50PX RADIUS

● Ask Me

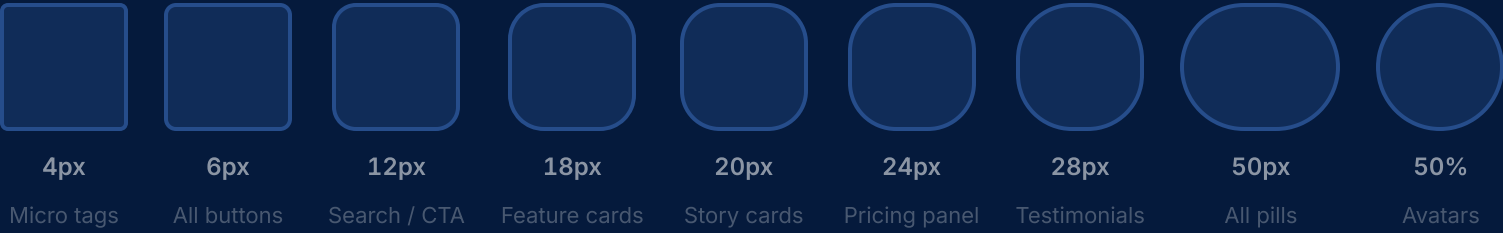

● Insights

● Data Magnet

Enterprise

Analytics

BORDER RADIUS SCALE

All action buttons = **6px**. All pills = **50px**. Cards graduate with prominence: 18 → 20 → 24 → 28px. Never mix these values.

Design with *intention.*

Lumenore

THE NON-NEGOTIABLES

- 01 All headings use **Space Grotesk 300**. No heading may use Fraunces or Inter. No exceptions.
- 02 Buttons are always **6px radius**. Pills are always 50px. Do not deviate from these values.
- 03 Section padding is **96px**. Intro-to-content gap is 60px. These are not suggestions.
- 04 Body text on white is **#4a5568**. On dark, `rgba(252,252,252, 0.72)`. No other values.
- 05 Use `--Explore-Button` for all **gradient CTAs**. Never redeclare the gradient inline in component CSS.
